# MyTrucksure™ SaaS Solution

The MyTrucksure™ is a purpose built SaaS app for the trucking insurance market. It is a technology platform for insurance Carriers, MGA's, Brokers and InsureTech's as well as Lloyd's syndicates and Risk Retention Groups. Whether your organization is large or small, it is for anyone who is looking to sell and service insurance to the highly specialized U.S. trucking industry.

**The benefits of MyTrucksure™ SaaS include cost effective, digital enablement that will drive business growth, operational efficiency and better customer service:**

- Increase quotation response rate and increase binding
- Eliminate manual processes and spreadsheets
- Easy access to all your underwriting and customer data
- Automated premium finance integration
- Connect to broader trucking digital ecosystem through easily enabled API connectivity

**MyTrucksure™ SaaS supports rapid go live for key trucking products and coverages that can be sold either mono-line or as a custom configured package including:**

- Auto Liability
- Truck & Trailer Physical Damage
- Non-Trucking Liability / Bob-Tail Insurance
- Trailer Interchange
- Cargo
- General Liability

MyTrucksure™ supports a fully digital policy life cycle, including rate, quote, bind, issue endorsements, renewal and cancellation and out of the box the collection of specific trucking data including owner–operator, carrier, fleet and driver information.

The app is connected to a growing ecosystem of trucking specific third party data and services specific to needs of selling and truck insurance including MVR retrieval, state auto liability insurance reporting and premium finance.

MyTrucksure™ powered by InsureMO® is based on latest micro–service, REST API, cloud native technology architecture. It is hosted in the U.S. on Amazon Web Services and is cost effective.
